# Motionnet
Serial Motion Control Solution

Specifications :
- Expandable multi-axis motion control & I/O control
- Support up to 128 axes or 4098 I/O points
- Achieve centralized control through a single cable connection
- Dramatically reduce wiring costs and spaces
- Support servo motors form Mitsubishi,...
- Provide intuitive development software and comprehensive function libraries to reduce the development time

Features:
- Equipped with the latest Motionnet control chipset support 2-axis Circular Interpolation and multi-axis Linear Interpolation
- Three-way isolation for power, communication and I/O, which provide better noise immunity and device protection
- Motion control modules are equipped with Terminal Blocks for easy wiring (additional terminal board is not required)
- I/O control modules are with ultra-thin design for space saving
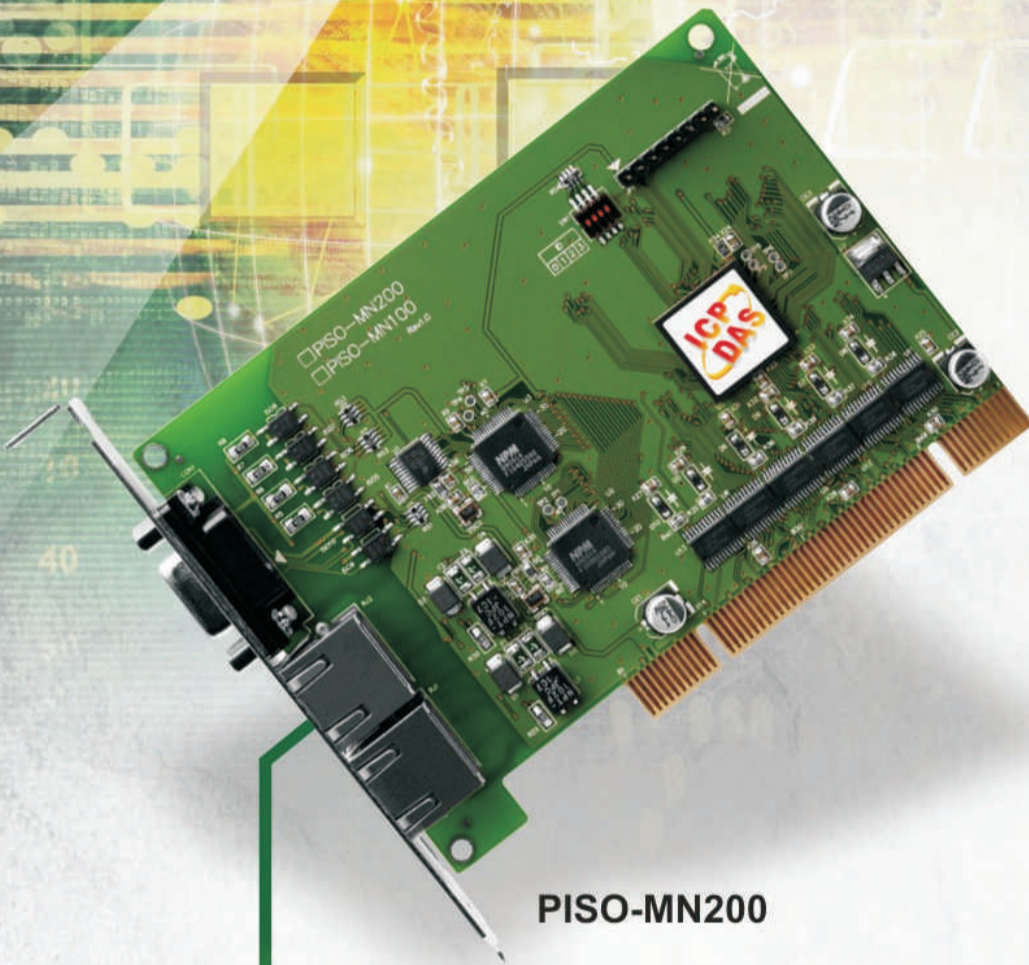

PISO-MN200

Support Servo Driver & Stepper Driver
