Wireless Location Solution

WLS_analyzer

WLS_analyzer Wireless locating software

- With graphical and friendly UI, the software indicates all real time locations.
- The software will save the emergency record and alert immediately
- The user can customize the tag's name

WLS-R01/R11

Wireless Locating System Receiver (Router)

- Supports 16 segments of RF channels with 2.4GHz and 400MHz
- Supports data conversion from ISM 2.4GHz frequency to 400MHz frequency

WLS-CFG

Wireless Location System Configurator

- Built in 2.4GHz 3dBi PCB directional antenna
- ISM 2.4GHz operating frequency
- Direct Sequence Spread Spectrum (DSSS) RF technology

WLS-T01/T02/T11

Wireless Location System Transmitter

- Supports the button help function
- Low power consumption design
- Built in 2.4GHz 3dBi PCB directional antenna

RFU-400

RS-232 / RS-485 to 429 MHz Radio Modem (Master)

- Sub-1GHz data converter
- External DIP and rotary switches for easy configuration
- 16 RF channel

WLS-T30B

BLE Beacon Pusher

- Frequency: ISM 2.4 GHz
- Wireless Standard: Bluetooth LE Beacon
- Supports temperature and humidity measurements
- No External Antenna required
