

Energy Management Solutions

- Power generation • Transmission • Power distribution •
- Electricity Consumption • Energy saving •

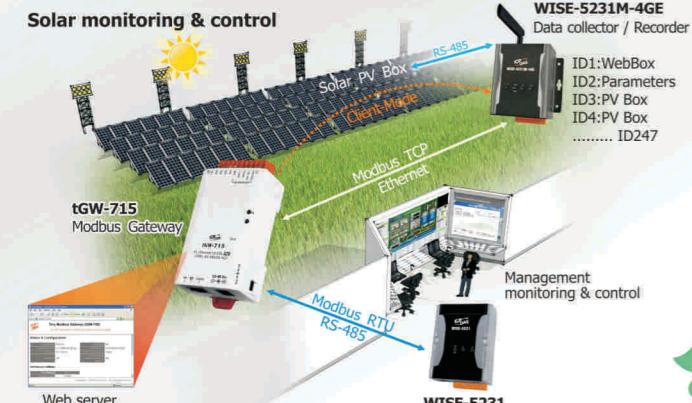

Green energy monitoring & control

- Fan status monitoring & control
- Transmission system real-time monitoring & control

Solar monitoring & control

Electrical Safety

- High pressure transformer monitoring & control

Building Energy Management

- Visualization of energy consumption
- Air compression and heat recovery ventilation system
- Fresh air system
- Water Resources Management

46x46cm

Equipment supervision and preventive maintenance

- Keep track of the machine information
- Instant exception handling
- Complete production information analysis
- Dynamic Prevention Maintenance Policy
