Energy Management Solution

Energy Data Management

Edge Computing

Work with IoT cloud platform

Feature

- No extra software tool is required, using browsers to perform system operations.
- Support ICP DAS Modbus Power Meters & Modbus I/O modules.
- Display real-time or historical power data; Provide power data statistics report.
- Power data logger operation, and data file auto send-back & recovery mechanism.
- Built-in IF-THEN-ELSE logic engine for power demand management, and device operations adjustment.
- Alarm notification via LINE, Messenger, WeChat, SMS and Email.
- Support Modbus TCP/RTU, SNMP and MQTT protocols.
- Connection to IoT Cloud Platform (Microsoft Azure and IBM Bluemix) and ICP DAS IoTstar Cloud software.
